

Another successful major food distribution for the students of AIBI and the members of Evrou Church of Christ in Athens.

During the last week Sonila and I covered 460 Km between buying and distributing the food from house to house.

Over 5 Tons of edibles (1050 items) were bought in different supermarkets, brought to the Church building, separated into individual packages and then distributed to every house. A total of 74 people were provided with food for 5 weeks in the Name of Jesus and we are planning on having another major distribution the second week of July.

It was a very busy week between Relief Program distribution, Bible Studies, teaching with the School and the Church and visiting with brethren and prospects. Usually our day starts at 5:30AM and ends almost midnights. Sonila is having a very sharp pain at her left foot sole (probably tendonitis) and we are visiting an orthopedic hospital to see a doctor today. We believe it is from the heavy work and after finishing with AIBI's graduation ceremony this coming Saturday, and some more food distribution to two more families, probably she will find the time to slow down a little. Please, keep her in your prayers.

A big "thank you" to Peter and Peace Ozah who helped with packages' preparation.

Also, deep appreciation to every one of you who are making this project reality.

May God continue to bless you all richly.

Love

Beni, Sonila
